One other thing, do you know who is in Andy's role now for the Suquamish?

Thanks,

Thanks Rob,

We will acknowledge the ongoing work and request frequent updates, from the co-managers, to help us judge any need for flexibility in this schedule.

Thanks James. I think that having NOAA's process/schedule for developing the guidance letter would be helpful in our deliberations. I would also hope that you are open to requests for flexibility either in the timeline or the content of the guidance letter as the co-managers continue to deliberate specific objectives.

Rob

Good morning Rob,

Based on our discussion with the comanagers last week, Susan is interested in sending an email to the co-managers, laying out our schedule for drafting the letter and forwarding it to the Council. I know this could impact the remaining pre-season discussions on objectives and FRAM version.

I wanted to give you a heads-up and ask if there are any concerns you'd like to discuss?

Let me know.

Thanks,
