Hi James,

We're still in a co-managers meeting but it will be ending soon, so how about Scott and I call you right afterward. Yes we had a good HC regional meeting yesterday and went thru our sampling and monitoring plan, and how we are seeking as much data as possible, and will promise to do the standard 20% but also expect even more than that because it is such a small fishery. Not sure what Cindy is getting at or why she would contact you because everyone is on board with our plan. However, we'll call you soon.

Thanks,  
Randy

Hi Scott,

I was reaching out to Randy to give you two a head-up that I would be responding to a request for clarification on sampling rates that Cindy had posed to us. It was an overall sampling question but it also had implications for the proposed troll fishery. She indicated the topic was discussed at a recent co-manager meeting.

In my response I do speak to the 20% rate, it's basis and use, and that it is the proposed objective in the Chinook RMP and in the SCSCI.

I plan to respond soon, so if you have any concerns, please let me know. O, give ma a call at 360-522-3673.

Thanks,
