Subject: Re: Actions taken in development of WDFW managed fishery season for 2021-2022 beneficial for Southern Resident killer whales

Hello Kyle and Kelly,

Thank you very much for the thoughtful letter outlining actions taken in development of WDFW managed fishery season for 2021-2022 and your assessment of how those actions are beneficial for Southern Resident killer whales. We appreciate your efforts to support recovery of Southern Resident killer whales and look forward to continued partnership on conservation efforts, including collaboration on the Be Whale Wise campaign.

Thanks,
Lynne

Lynne:

Please see the attached letter from WDFW Fish Program Director Kelly Cunningham describing measures planned for WDFW managed fisheries in 2021-22 relative to Southern Resident killer whales. This letter is similar to those you have received in recent years, but with additional and updated information specific to this year. Feel free to contact me with any questions.

Thanks,

Kyle
