Hi Everyone,

Attached is a page from the LOAF (57) that was submitted last week that contained an error related to recreational fisheries in October and November in all of Hood Canal. The State's intention was to have Chinook non-retention starting Oct 1 in all of HC and the LOAF language calls for 2 (hatchery) Chinook as part of the daily limit. I have confirmed with modeling staff that this time period was modeled as non-retention for Chinook.

Let me know if there are additional questions.
