Cindy,

Thanks again for sharing these estimates. I've included a "NOAA avgs" tab in the workbook. I used the info to calculate averages over the last 5 and ten years and compared them to the prior period. Then calculated the difference in the avg rate change for each - pretty straight forward. I would just ask if you can verify that I used the correct rates, based on the annual tabs?

Thanks and appreciate your help with this,

James, These are the correct terminal harvest rates on Skokomish natural spawners. Thanks,

Mark Downen
